

Currency Select[®] by Travelex:

Enhanced customer choice and additional revenue for your business.

Why Dynamic Currency Conversion?

Your card paying international customers are normally charged a foreign exchange margin by the card scheme or their card issuer when the transaction is settled. Customers benefit from choice, exchange rate certainty and convenience of seeing the exact amount which will be debited to their account at the time of the transaction. You can benefit from the FX margin which would normally be made by the bank.

Why Currency Select? It provides

dynamic currency conversion for your customers through ATM's, point of sale systems or your web portal. Currency Select leverages Travelex's credentials as the world's foreign exchange specialist with a dedicated team of card payments experts and a transaction processing platform that we own, operate and continuously evolve.

Why Partner with Us?

Expertise

- We have best in class industry solutions for key sectors including higher education, premium hotels and airlines.
